sources of revenue, such as licensing fees and nes and assessments, as well as total taxes. Total budget represents the annual operating budget of the state insurance department. Total employment is the number of full-time state insurance department employees. The state rank represents the rank relative to the state with the largest respective number among all states.

Cost of Regulation

The cost of regulation is calculated from data supplied by state insurance regulators and collected from insurers' nancial lings. It is a ratio that compares the insurance department budget to total premium written in the state. For state-speci c details on the gures used, pl ease refer to the IDRR technical notes.

Property/Casualty Premium by Line of Business

The premiums are from the annual nancial statement information that property/casualty insurers le with the NAIC. Property/casualty premium is subdivided into several categories. This data includes information on state funds reported separately and added to the premium volume during composition of this report. The state rank represents the rank relative to the state with the largest respective premium by line of business among all states.

Insurance Industry Employment

The U.S.Bureau of Labor Statistics (BLS) produces the Quarterly Census of Employment and Wages (QCEW). The QCEW is derived frhe QCEW tg36 hnts the r
